

Access to the Program:

Island Health's Home and Community Care Case Managers can refer you to the Community Bathing program. Clients may request 1 bath/week or more, as needed. The fee will be based on your home support rate.

Those who prefer not to access the program through Home & Community Care may call the Receptionist at Glacier View Lodge directly at 250-338-1451. The private pay rate is \$38 per bath. Punch cards are available to reduce the need to bring payment each week.

Community Bathing Program

Glacier View Lodge offers qualified staff and use of its bathing facilities for clients in the community who are unable to bathe comfortably at home.

If you have mobility problems, are unsafe in the bath at home, or your disability doesn't allow you to use household bath or shower equipment, then this program is for you.

We have a dedicated bathing room that provides the optimal bathing experience. Friendly staff personalize each bath to your preferences and comfort.

Warm towels are provided from our warming cabinet for your comfort.

Assistance with shaves, nail clipping, and hair washing is included.

Personal weight recording can also be provided.

Each bath appointment is 45 minutes.

Clients have the choice of three different sizes and shapes of tubs:

Tub Number 1 is a Century tub with hydrosound. Clients are bathed in an upright sitting position in a comfortable and secure chair lift. There is no manual stress involved. We just lower you slowly into the filled tub. Lower legs and feet are in a foot well.

Tub Number 2 is the Malibu long tub with optional Jacuzzi style jets. This is suitable for those who do not have the core strength to sit upright in a chair. An overhead lift is used to place you in a semi-recumbent web chair for bathing. Legs are stretched out.

Tub Number 3 is a newer Century tub offering bathing in a sitting position in a secure chair lift.
